

Having the [html](#) files attached to this homework, add the next elements and changes to it:

- Add Email element to the [html](#), next to Phone element
- Add gender element to the [html](#) (use select tag) next to Last name element
- Enclose all form elements (input elements) inside form element. Use fieldset to group together all form elements (First name, Last name, Gender, Email, Phone, Birth date and Save). Set the caption of the fieldset to "Contact"
- Set title attribute of Save button to "Save contact". Set title attribute of Show/Refresh button to "Show or Refresh contact list"
- Change the text in front of form elements to label elements. Ex.: First name.
- Add a link to the bottom of the page with to a new page. Link is named "Contact". Create a new page named [contact.html](#) and add to it your name as paragraph, email as hyperlink and a picture of you, or your dog, or cat (any picture :) is ok) as image. Add this newly created page to the Contact link defined before.
- Replace the caption of bottom link (www.scoalainformala.ro) to the new caption Scoala Informala™.
- Set the color of all text elements to blue.
- Set the background color of all buttons to yellow.
